PROFILE

Aspiring product manager with hands-on experience in operations, logistics and e-commerce. Contributed to an SME inventory-management product end to end during HNG product management training — user research, PRD writing and feature prioritisation. Brings firsthand domain knowledge from running an independent electronics business and coordinating a residential construction project. Works with AI tooling as a multiplier: prompting for research and drafting, building frontend and UI/UX prototypes, and automating repetitive workflows. Currently studying International Business at LAB University of Applied Sciences, looking for internships in logistics, e-commerce or SaaS.

EXPERIENCE

Micro Business Owner — Electronics & Gadgets — Self-employed

Ogun State, Nigeria · 2024 – Jun 2025

- Ran end-to-end product operations: sourcing, pricing, inventory and customer experience for 30+ weekly device sales.
- Cut slow-moving stock and improved turnover by acting on gaps in the product mix — informal, data-driven catalogue decisions.
- Adapted go-to-market strategy to inflation, currency fluctuations and competitor pricing.
- Built a loyal customer base through transparent communication and structured after-sales support.
- Business paused on relocation to Finland for higher education.

Assistant Project Manager — Construction — Building Contractor

Ogun State, Nigeria · 2023 – 2024

- Coordinated contractors, suppliers and clients to keep a 6-flat residential project on budget and on schedule.
- Resolved a mid-project supplier bottleneck by sourcing alternative vendors, preventing schedule delays.
- Tracked daily on-site progress and flagged quality issues early.

Warehouse Assistant — Delmart Farms

Ogun State, Nigeria · 2023 – 2025

- Handled 100+ items per shift across inbound and outbound warehouse operations.
- Improved inventory organisation to reduce time-on-task and improve workplace safety.
- Collaborated with delivery drivers to keep distribution accurate and on time.

Cleaner — Hospitality — Airbnb Apartments

Abeokuta, Nigeria · Aug 2020 — Nov 2022

- Managed operations across up to four apartment turnovers per day with structured cleaning and restocking routines.
- Maintained consistency and detail quality that supported positive guest experiences.

PROJECTS

MyMemo

Product build · side project · 2026

A live Finnish vocabulary game for language learners: spelling rounds, spaced repetition, personal word banks and lightweight accounts.

- Designed the product loop and shipped it end to end on Vercel with a Turso database.
- Built spelling drills with CEFR levels, review scheduling and progress tracking.
- Handles real users with per-browser guest profiles and optional accounts.
- Built with an AI-assisted workflow — prompt-driven implementation and fast iteration.

Naija Penalty

Game · Three.js · 2026

A penalty shootout on a dusty village pitch. Pick a player from anywhere in Nigeria, take five penalties, then go in goal and try to save five.

- Fully procedural world — pitch, huts, palms, players, ball and sound generated in code.
- Built with Three.js and Vite; zero external image, model or audio assets.

Suomi Sniper

Game · Three.js · 2026

A stealth sniper game in a winter war. Hold a line against advancing columns where every shot you take tells them roughly where you are.

- Sortie-based objectives that escalate — sentries, columns, officers, watchtowers and supply dumps.
- Built with Three.js and Vite, with a playable live build.

SME Inventory Tracker

Product management · HNG · 2025 — 2026

A cross-functional product helping small-business owners manage inventory across multiple e-commerce platforms (Shopify, AliExpress and others).

- Contributed user research and wrote sections of the Product Requirements Document.
- Took part in feature prioritisation and wireframe reviews.
- Worked in Trello for task management and Figma for review cycles.

EDUCATION

BBA, International Business

LAB University of Applied Sciences · Lahti, Finland · Sept 2025 — present

Relevant studies: international business, marketing, logistics, project management, supply chain and operations.

High School Certificate

Paddy Bartholomew High School · Nigeria

CERTIFICATIONS

Product Management Certification

HNG · 2025 — 2026

Product thinking, user problem definition, user research, feature prioritisation, PRD writing and cross-functional collaboration on live product tasks.

Google Project Management Certificate

Google · 2024 — 2025

Project planning, scheduling, risk management and process improvement across Agile and Waterfall methodologies.
